

British Chamber of Commerce and Atlas Analytics
invite you to participate in the breakfast briefing

Intelligence-Led Threat Prevention

Learn how to spot and stop cyber and human threats to
your company's secrets, staff, finances and reputation

20 April 2017 at 9.00 am
Jalta Boutique Hotel
Václavské náměstí 45/818, Prague

Atlas Analytics

Criminals are increasingly more creative in how they choose to target and then exploit businesses and their staff. Commercially sensitive information and personal details are a valuable commodity to them. To help Czech businesses be more aware of the threats they face and how to prevent them, Henry from Atlas Analytics along with his colleagues from Metis Services in Sweden will discuss the problems posed by and solutions to:

Online Hostile Reconnaissance

Criminals use online sources to exploit access points in either physical or online security.

Social Engineering

A non-technical method of intrusion that tricks people into breaking normal security procedures.

Exploiting Corruption and Illicit Influence

Criminals look for individuals or segments of an organisation they can manipulate. They then seek to try and recruit insiders to provide commercially sensitive material; Illicit Influence.

Henry Rimmer

Henry is an internationally-acclaimed intelligence analyst and award-winning communications expert, designing and delivering bespoke training and mentoring solutions internationally. His work helps individuals and organisations working in government, finance, energy and technology to better identify risks and opportunities, and make more-informed decisions faster. Henry spends his time between Prague and London. www.atlas-analytics.co.uk
